Comparison of FF DIN (● top, ○ middle and ■ bottom) and DIN from 1981 (■ middle) resp. 1936 (■ bottom). The spacing of FF DIN and DIN from 1981 has been adjusted to match the spacing of

DIN from 1936. For FF DIN, the grid and the single stroke weight were abandoned. The weight of the horizontal curves has been reduced. Curves, and their transitions into straight lines were designed

fluently. Having the same weight as Mittelschrift, Engschrift appears too bold. Thus, FF DIN medium condensed (not shown) has been drawn thinner. Also, it matches the x-height of FF DIN medium.
